

RISING LION

Rising Lion serves up reggae in various musical styles, accompanied by his fiery blues guitar. The group's sound is a mature blend of reggae, dub, funk, hip hop, blues, and soul. At shows, the Lion band mixes covers in with their original tunes, and while these musical tributes include reggae legends like Bob Marley and Peter Tosh, they are equally likely to play reggae versions of Jimi Hendrix, Bob Dylan, and the Allman Brothers. Rising Lion focuses on bringing a positive message and socially conscious philosophy to the people.

With an unbelievable mix of roots and dancehall reggae, R&B, Rock, Blues and Hip-Hop in his sound, Rising Lion has a reputation for bringing good vibes to every show with conscious lyrics and soul-stirring music. Over the last 16 years, Rising Lion has toured across the US and abroad, playing thousands of shows, and becoming a favorite at various festivals and concert series. While the band's members have changed over the years, Rising Lion continues their commitment to diversity in music and the message of peace, love, hope, and equal rights for all mankind.
